

SuperGen 4

UK Centre for Marine Energy Research

Flexible funding scheme

Flexible Funding

WP6 will further engage the UK academic community, by

- competitively awarding up to £250k to connect and integrate the capacity and facilities of other universities in two 12 month projects aligned with selected WPs. This would run months 7 -18.
- engaging with Wave Energy Scotland who have committed to match fund up to another £250k to sponsor more flex projects.
- further gearing that contribution with industry match funding of the projects that are jointly supported on a 'thirds-model' similar to that of the ORE Catapult.
- running a competition for access to the FloWave Facility in 4 one-week-long experimental-science campaigns.
